Fuel Surcharge for Non-Consent Towing

We have established the chart below to allow for the rise and fall of fuel to minimally impact rates for non-consent towing.

Considering rates were established when fuel costs were at or around \$2.00 per gallon, we feel this should be used as the “control” or “static fee”. As fuel increases .50 cents per gallon from the base of \$2.00, a surcharge should be allowed of 10% of the base rate. Conversely, if prices should drop, they would decrease by the same amount.

Fuel Cost	Surcharge
\$2.00	0%
\$2.50	10%
\$3.00	20%
\$3.50	30%
\$4.00	40%
\$4.50	50%
\$5.00	60%
